## Central Michigan University

### Student Teacher Observation

Student Teacher: **Alyssa Benedetti**

School: Pere Gabriel Richard Elementary, Grosse Point Public Schools

Teacher: Yvette Vektor      Grade: 1

Date and time:      September 28.2010

Lesson: Bullying

Observer: Dr. Michael Magarrey

#### Planning:

Excellent lesson plan! You include grade level expectations, translate them into achievable objectives, and have a strategy for achieving those goals.

#### Lesson delivery:

Nice start to the lesson. You began by brainstorming to find out prior student knowledge. Kids seemed aware of the "De Bug" system but you ensured their understanding before proceeding.

Great idea to have students role play bullying situations. Tough for kids to play the bully.

Nice discussion with students after the role playing. You were able to apply the examples to real life and reinforce the rules. Review! Review! Review!

Good idea to model the expectations for the written assignment. You help make the expectations clear and also set expectations for quality.

You did a good job of getting kids on task. You reinforced the expectations then moved around the class helping individual students.

Student interactions:

You are consistent in ensuring kids follow the rules (raise hands before answering)

You use lots of positive reinforcement to celebrate student involvement.

Student management:

You keep a nice balance between allowing kids freedom to enjoy the class and maintaining order.

Conclusions:

Nice class! Kids were interested and engaged throughout the class.

Suggestions:

I have no suggestions for improving this class.
